

FUNDED PROJECTS (RESEARCH AND CONSULTANCY)

As Principal Investigator: Approx. 36 crores

As Co-PI/Team member: Approx. 20 crores

Funding agencies: The World Bank; USAID; UNU; ADB; APN; Enel Foundation; ICEWARM, Australia; DBT; UKIERI, ICIMOD; Corporates, Gol and Foundations

Year	Projects
2025	PI- Assessment and restoration of water bodies at four sites maintained by the Archaeological Survey of India. Funded by Bisleri International Pvt. Ltd. Rs 15.92 Lakhs plus GST.
2024	PI- Measurement and delineation of 5.668 Acres land at Narela-Bwana MSW facility, Delhi. Rs 5 Lakh plus GST. Funded by MCD. Completed.
2023	PI- <i>Estimation of impact adjusted virtual water of a production unit for water credits: case study of a beverage industry.</i> Funded by Bisleri International Pvt. Ltd. Rs 14 Lakhs plus GST. Completed
2022	PI- <i>Appraisal of DPR for development of sewerage system in the left-our areas of Leh Town.</i> By Office of the Executive Officer Municipal Committee, Leh; The administration of Union Territory of Ladakh. Rs 1,28,620 + GST. Completed PI- <i>Appraisal of DPR for Setting up of Comprehensive sewerage scheme including Sewerage Treatment Plant in Kargil Town.</i> By Office of the Executive Officer Municipal Committee, Kargil; The Administration of Union Territory of Ladakh. Rs 1,28,620 + GST. Completed. PI- <i>Assessment of activities implemented by IPCA under the CSR project of SBI card.</i> By Indian Pollution Control Association. Rs 1,20,000 + GST. Completed
2021	PI- <i>Towards sustainable urban water management in HKH Region: a participatory approach to improving water sustainability in mountain cities.</i> Funded by: Asia Pacific Network (APN) for Global Change Research, Japan. USD 28000. Completed PI- <i>Consultancy to Vet two DPRs on Solid Waste Management.</i> By Housing and Urban Development Department, Directorate of Urban Local Bodies, Ladakh. INR 218000 (plus taxes). Completed. PI- <i>Consultancy for comprehensive environmental quality assessment during the manufacturing of Lead Acid batteries at Nunegundla Palle and Karakambadi Location, India.</i> Funded by Amaraja Batteries. INR 1440000 (plus taxes). Completed
2019	PI- <i>Consultancy for Sustainable water habitats.</i> Funded by TERI. 12 months. INR 849600. Completed PI- <i>Consultancy for Scoring of Innovation and Best Practices under Swachh Survekshan 2019.</i> Funded by Karvy Data Management Service Limited. 1 month. INR 1082650. Completed

2018	PI- Research project “Transboundary water governance & role of institutions to enhance the capacities of marginalised community in Mahakali River Basin. 1 Year 3 months. Collaborating partner CDES Tribhuvan University, Nepal. Funded by ICIMOD Nepal. USD 20000. Completed. PI- <i>MDP on Gender, Equity and Water Management</i>. Funded by ICEWARM, Australia. 12 months. AUD 62200. Completed Expert team member- <i>Uzbekistan: Energy efficiency in water utilities. Energy audit and Prefeasibility study for Namangan city Suvokova</i>. Funded by the World Bank. 6 months. USD 200000. Completed. PI- <i>Preparation of an assessment report of ‘Water Study higher Education Institutions in India’</i>. 3 months. Funded by ICIMOD. USD 5000. Completed.
2016	Expert team member- <i>Energy Efficiency Review of Dar Es Salaam City Water and Sewerage Services</i>. Funded by the World Bank and the Government of Tanzania. 9 months. USD 120000. Completed.
2015	PI- <i>Socio-ecological metabolism study for urban water planning: A case study of Delhi</i>. Funded by Enel Foundation through University of Toronto. 1 year. USD 21000. Completed
2014	PI- <i>Strengthening Water and Sanitation in Urban Settings</i>. Funded by USAID, 3 year, INR 4,25,00,000. Completed PI- Institutionalising Department of Regional Water Studies at TERI University. Coca-Cola Foundation, Atlanta. USD 1.2 Million. Advisor- <i>Understanding decentralised energy interventions and their success conditions in select countries of Asia-Pacific</i>. Funded by ProSPER.Net, Japan. 1 year. USD 12000 Advisor- Improving access to safe water using River Bed Filtration Technology
2013	PI- India section, <i>Urban metabolism surveying of Delhi, Mumbai and Kolkata metropolitan areas</i>. Funded by the University of Toronto. 6 months. USD 4500. Completed PI- India section, <i>Understanding and quantifying the water-energy-carbon nexus for low-carbon development in Asian Cities</i>. Funded by Asia Pacific Network. 2 years USD 70000. Completed PI- South Asia Regional workshop on Integrated Water Resource Management. Funded by the World Bank. 3 months. USD 50000. Completed. PI- Asia regional workshop for the programme on LCA and LCCA of infrastructure projects. Funded by UNU Flores, 2013. USD 30000. Completed
2012	Co-PI, <i>Preparation of Medium Term Investment Plan (MTIP) and Pre-Feasibility Studies (PFS) for an Integrated Water Supply Distribution System in Greater Visakhapatnam, India</i>. Funded by CDIA. 1 year. INR 45,00,000 Co-PI, <i>Solar-accelerated design for small-scale biogas digester</i>. Funded by UKEIRI. 2 years, GBP 40000

2011	PI- Development of educational benchmarking to revitalise higher education for sustainable development. Funded by Hokkaido University, Japan, in collaboration with RMIT, Australia. 2-year USD 12000 PI- Greening of Delhi Ridge. Funded by ONGC under CSIR activity. 5 years. INR 8000000
2010	PI- Bioenergy from Waste: Hydrogen and methane production. Funded by DBT, Gol. 3 year. INR 950000 (BT/PR-11517/BCE/08/709/2008)
2009	PI- Online Pilot program on Sustainable development practices in public policy-leading to a Diploma Program. An activity of ProSPER.Net, funded by the Ministry of Environment, Japan. 3 years. USD 56000 Core Team member, Content generation for Postgraduate programs in Environmental Science, New Delhi: TERI University, Sponsored by MHRD, New Delhi. PI- ITEC programme for mid-career professionals from developing countries, funded by the Ministry of External Affairs, Gol. INR 10 Lakhs. Completed
2007	PI- Performance evaluation of rotating biological contactors for sewage treatment in tropical climatic conditions. Funded by the Federal Ministry for Education and Research, Germany and in collaboration with the University of Karlsruhe, Germany and IIT Delhi
2002-2007	Coordinated numerous consultancy projects to assess the adequacy of effluent treatment plants in small-scale industries in Delhi. The projects were routed through the Delhi Pollution Control Committee, Delhi. The total projects completed amount to more than INR 10 Million.
1995-2000	PI /Core team member in the following projects: ▪ <i>Investigation on respirable particulates and trace elements with source identification in air environment of Korba.</i> Funded by Ministry of Coal, Government of India ▪ <i>Environmental Improvement and Sustainable Development of the Agra-Mathura-Ferozabad Trapezium in Uttar Pradesh.</i> Funded by Asian Development Bank, Manila. The aim of the project was to identify feasible intervention projects in thirteen components that will help in improving the overall environmental quality of the region. I was involved in conceptualizing the components related to solid waste management and industrial wastewater and sewage treatment. ▪ <i>Preparation of a dossier on environmental and safety impacts of Orimulsion.</i> Funded by MC BITOR, Venezuela. The project assessed the environmental and safety impacts of various fuels to be used for power generation in India. ▪ <i>Water quality transformations in distribution systems.</i> Funded by UNDP-World Bank Regional Water & Sanitation Group-South Asia. ▪ <i>Recent developments in anaerobic digestion technologies for energy recovery from industrial effluent and their applicability in Indian context.</i> Funded by New Energy and Industrial Technology Development Organization (NEDO), Japan.

-
- *Assessment of alternative environmentally sustainable sources of energy generation – A river basin study for India.* Funded by NEDO, Japan.
 - *India Sustaining Development,* funded by *Ministry of Environment and Forests.*
 - *An innovative bio-process for stabilization of and energy recovery from solid waste,* funded by *New Energy and Industrial Technology Development Organization (NEDO),* Japan. Two phase anaerobic treatment technology for digestion of municipal solid waste will be developed and tested on a pilot scale.
